SCIENCE CHAIRPERSON

Dear Rotary Club member,

"FIRST" ("For Inspiration and Recognition of Science and Technology") is a national contest which immerses high school students in the exciting world of engineering. This is an important extra-curricular activity, which gives us a chance to team up with engineers from local businesses. We will be participating in a hands-on, multidisciplinary engineering project, in which we compete against other schools to design and construct a "champion robot". In addition, we will acquire key skills in project management, which can be applied to our schoolwork and ultimately in our future careers.

The Hauppauge High School "Titans" robotics team #358 needs your help! We need to raise funds to participate in the NASA sponsored "FIRST Robotics Competition" in 2001. Last year we competed successfully in the LI FIRST Regional competition and then in the National Competition at Disney's EPCOT center in Orlando.

Can you help? First we need to raise the necessary funding. Secondly, we ask for your help to provide accessories, supplies and/or services such as our team shirts, hats, buttons and banners, etc. If your company can provide milling, welding or other machine shop time, we would be extremely grateful. Sponsors will receive honorable mention on our website and in our Titan's newsletter.

Titans Team Funding Categories:

- \$1000 + Titans Partner
- \$500 + Titans Benefactor
- \$250 + Titans Sponsor
- \$100 + Titans Mentor
- \$50 + Titans Contributor
- up to \$49 Titans Friends

Can we count on you to help us with a contribution? It may be tax-deductible. Please fill out the contribution form attached and mail it with your check to Hauppauge High School.

In the meantime, if you want more information on the FIRST Robotics Competition, see the US FIRST website (www.usfirst.org) or the Fluid Power Distributor's Association website (www.fpda.org).

Sincerely,

The Robotic Team

Please make checks payable to: Hauppauge High School - Robotics Team

Mail contributions to: C/O Mrs. Cassans- Robotic Team Advisor
