

FRC Team 358

2002

Sponsor

Thankyou letters

Dear Festo,

I am very grateful that you ~~paid~~ for our trip to nationals. It was a very exciting competition. I had a really good time. It was my first time down here and it was amazing.

The first round of competition was very exciting. We did ok with a record of 5-3. We didn't make it to finals but it was still an amazing experience.

I thank you again for sending us to nationals.

Sincerely,
John McDonald

John McDonald

Dear Festo,

Thank you very much for being our sponsor's and supporting us this year. I'm sure you've already heard about how we have done at the regionals and we were decent at nationals; we couldn't of done it with out your support.

Being able to participate in the FIRST experience showed me just how important science and technology is and what team work can accomplish. I made so many friends during nationals and had the time of my life. Thank you again for your continual support and making our trip to nationals possible.

Sincerely

Megan Montross

Megan Montross

Dear Festo,

Thank you very much for your continued support. The Titans have had an incredible year! After placing 7th on LI + 2nd 1st in NYC our future potential has become very clear. The experience of FIRST has convinced me to pursue a lifetime leadership role. As a junior, I am looking for colleagues that specialize in biomedical engineering; a career inspired by FIRST, of course! Thank you very much for helping to mold my future. I hope you continue to provide support so that future team members can benefit as I have.

Sincerely,
Jessica Moore

Dear Festo Co.

Thank you for paying a big part
in our trip to nationals we had a
great time. We had some minor
problems like blowing a fuse. That was
basically all the problems that we
had. It was a great experience.

From

Eric M. 

P.S. Thanks for all of your
Engineering help.

To Festo,

Thank you so much for your sponsors this year. It has helped make my senior year even more enjoyable. Without your help we (team 358) would not have been able to win the NYC Regional let alone even be able to build a robot. With your support I was able to make the decision that I wanted to be a mechanical engineer. Your donations of more and engineers have helped teach me many things about my future. And my work experience at Festo in the IT-CCA department has been an invaluable

Sincerely,

Teddy Melnick

To whom it may concern at FESTO,

I wish to thank you for your support and sponsorship of our robotics team here at Houppauge, and for your recent contribution to defray the expenses for the trip to the national competition at Epcot.

Since this is my first year on the team, my experience with the F.I.R.S.T. organization has been exciting and has taught me much about technology, teamwork, and leadership. I have had an amazing time working on the robot.

I hope that I can count on your continued support throughout the next year. Once again, you have my thanks.

Sincerely,

Jain McLeod

Jain McLeod

Dear Festo,

I want to thank you for all your support and help during our 2000 robotics season. Through the help of your company's support, has lead me apply and get accepted to Hofstra U. as a comp and mechanical Engineering major. I wish to thank all the engineers who gave their time and energy to our cause. We will soon be sending you updates in the form of video and newspaper articles about our progress. Thank you again for all your help.

Sincerely

Jamie Pattison

Dear Fests,

Thank you very much for helping us get to Florida for Nationals and sponsoring us. You have helped us out a whole bunch. As a Freshman and first year team member, my experience has turned out great. With Mr. Schuler's guidance/mentorship I have gained a better understanding of responsibility, Public Relations, and a basic understanding of building and using tools. When I first started ~~it~~ I wasn't sure what F.I.R.S.T. was all about, but now and have enjoyed learning about it. Also thanks to your help we did very well with our robot (especially at New York City)!

Sincerely,

Emily Rose Melnick
Emily Rose Melnick

Dear Festo,

I'm very thankful that you gave us all of that money to pay for the trip to nationals. I also want to thank you because you helped us to get as good as we were. I mean, we won 1st place in the NYC regional, and we finished good in both Suffolk and Nationals. I also learned a lot about teamwork here. Without your support, I wouldn't have made new friends from other states, either. Plus, because of your donation, the trip only cost \$105. Our experience has been invaluable, thanks to you.

Sincerely,
Bryan Morales

To Fcoto

Thanks for making this awesome trip possible. At First (pun intended) I got to see the animations everyone did for their teams, and all the hard work they did. We also had alot of fun at the hotel and party. I would also like to thank you for designing such an awesome robot, it did really great and performed it's task perfectly. Also, next year, I promise to get the animation handed in.

Sincerely
Anthony 

Dear. Festo Co.

Thank you for all your support
time and money. If not for you our robot team
could not be what it is today. I am
thankful for you sponsoring us to go to
Nationals. As a Freshmen the Robotics team
has been a big part of my life. It is
~~was~~ one of the best things that i have
done.

Thank you: Rich Wisniski

To Festo,

You guys are the best.
~~IF~~ It wasn't for you, the team
would not have gotten through
the 2000 year of first. You
guys are the best sponcers
that we ever had. I wanna
thank you for sending me
and the whole titians team
to Nationals in Florida.
I had a great experience
that I would may never
have had ~~IF~~ festo wasn't
one of our sponcers. Thanks
for all the hard work that
you have given the team.

From
Scott Probst

Dear Festo,

Thank You!!! Without you we would be nowhere
nowhere. You helped us to build, design, & strategize a great robot
your time, engineers, skills, product & your great Sponsorship
brought us to how far we came. I can not thank you
enough for the many things you have done. You made us
who we are.

Thanks again and again,
Alex Vinelli
